# Project Explanation

**1** Canvas #1

My first use of the canvas tag was used to place the stagline under the logo. It reads "*We are all about energy*".

**2** jQuery #1

I used jQuery.animate() on a button to make the photo gallery appear in case anyone wanted to view the photo gallery.

**3** Photo Gallery

I used jQuery Coin Slider as a photo gallery to display various energy related photos of the earth. Clicking the photo will lead to the site I acquired the photos from.

**4** Bar Graph

I used Google Charts to display a bar chart containing information about different appliances in a home and how much electricity they use.

**5** jQuery #2

I used jQuery.animate() on a button to animate the interactive data visualization.

**6** Data Visualization

I used divs and jQuery to make the chart regarding types of lightbulbs.

**7** Canvas #2

I used Canvas to display a little graphic at the bottom of the page.
